PROFILE

I am a dedicated self-taught web and software developer. After high school, I studied and graduated with a psychology degree, but I knew it was not what I wanted to do with my life. Technology has always interested me so I started to learn a bit of programming, and was hooked ever since. I have been doing web and software development since 2019. I think what gives me an edge is that I am passionate about this field and always want to learn more to further improve my skills. I didn't just go through a computer science degree because I had to, I learnt this because I wanted to, and had the drive to continue learning.

EMPLOYMENT HISTORY

Front End Developer at Raging River Trading, Pretoria
November 2021 — Present

My main role at Raging River is to assist with the front-end development of the new Betway web app. Among the tech we use for the project are the front-end framework, Vue, the UI library Vuetify and the Vue framework Nuxt.

Some of my main responsibilities include implementing new features, fixing bugs and writing clean and maintainable code. I also have to ensure that the code I write is performant and tested well. I also have to communicate and coordinate with the back-end team from time to time to request new endpoints to be developed, or new data to be included in existing endpoints. I also have to communicate with the people on the business side of the project to ensure that requirements are met.

Junior Software Developer at Thinwood.co, Pretoria
July 2021 — November 2021

This was a fast paced startup environment where I had to constantly learn new technologies. We worked with the AGILE principles, using Jira and Bitbucket. I learned Angular with TypeScript and Android with Java for this job specifically and built angular and android apps respectively. My responsibilities also included designing and wire-framing app mockups with Miro.

Freelancer
June 2020 — June 2021

I have been casually freelancing on and off since I felt confident enough to do so. I have completed 3 official freelancing projects since mid 2020 together with a couple of my own personal apps (see portfolio and GitHub)

EDUCATION

Bachelor of arts, University of Pretoria, Pretoria
January 2015 — December 2017

I graduated with a Psychology and Sports Psychology Bachelor degree.
